Resilience Grant

Types of resilience-based projects which will be considered

1. Physical Resilience (Built)

Enhancement (or building back better) of current property, equipment or infrastructure by increasing resilience capabilities to withstand, respond and recover from natural disasters.

Examples: building modifications (guttering, drainage, water storage), emergency power sources (solar/generators), retro fitting infrastructure to make them sustainable.

2. Nature-based Resilience (Environment)

Support of nature-based solutions that add natural protection to the built environment, including restoration, rehabilitation and management of vegetation.

Examples: Activities that assist in improving environmental degradation – erosion, siltation, scouring and biodiversity loss.

3. Social Resilience (Human and Social)

Improvement of public awareness and preparedness of disaster risks and impacts to maximise broader outcomes such as productivity, connectivity and social inclusion.

Examples: Education programs, planning workshops.

Resilience Eligibility Criteria

To be eligible for funding your organisation must meet each of the criteria outlined below:

1. Your organisation must be either:
 - a small to medium community organisation;
 - a charity or other organisation with a charitable purpose; or
 - a Queensland First Nations Shire*.
2. The project must benefit Queenslanders who have been impacted by natural disasters. This includes resilience-based projects which relate to our funding categories; **Physical, Nature-Based and Social Solutions**.
3. The project must be completed within 6 months of grant approval.

4.The grant must be used to:

- pay for material items or something tangible; or
- have a positive community impact by reducing disaster risk and the impacts of natural disasters; or
- help raise awareness and build community engagement in resilience; or
- pay for relevant project costs to assist in the delivery of a resilience-based project which will reduce disaster risk.

5.Resilience-based project may include aspects such as drainage and materials, surfaces and fixtures that are more resilient to damage. A clear rationale of “Build Back Better” for improving the infrastructure will need to be established in the application to be eligible for mitigation support.

6.Applications to the RACQ Foundation are expected to be for amounts of up to \$25,000 with requests for amounts of up to \$50,000 in exceptional circumstances only.

7.Applicants may only receive a grant once every 12 months. Applicants which have received grant approval in the previous 12-month period, will not be considered.

8.Organisations that have not considered appropriate insurance requirements to ensure their assets have adequate insurance coverage (or the available level of insurance), may not be able to obtain a grant for these assets.

9.Where a third party is responsible for repairing or building infrastructure and items and not the organisation (for example a landlord under lease or a local government authority), the third party is responsible for making these repairs or constructions, whether or not covered by insurance, and the organisation is not eligible to make a claim for assistance from the Foundation for these items.

10The RACQ Foundation Trustee Board may, in its absolute discretion, resolve to provide a grant to organisations that do not strictly meet the above criteria and may provide grants in addition to the cap.
